Affinity Credit Union
Administrative Offices

Location: Saskatoon, SK
Developer: Meridian Development
Architect: Kindrachuk Agrey Architect Ltd., Saskatoon, SK
Maxxon Applicator: Industrial Restoration Services, Regina, SK
Scope: 24,000 sq. ft. of LevelRight poured at a depth of 1/2” to 3”

When Affinity Credit Union acquired the old Wilson School building Maxxon’s LevelRight was selected to correct badly sagged and damaged concrete floors. LevelRight was poured from approximately 1/2” to 3”, providing a smooth, level surface ready to receive a variety of floor goods. Especially important was the light load achieved by LevelRight versus a concrete overlay.
